Q4. Please give details of why you consider the Local Plan is not legally compliant or is unsound. Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Local Plan, please also use this box to set out your representation.

Please note that your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation. After this stage, further submissions will be only at the request of the Inspector, based on the matters and issues he/she identifies for examination.

Q5. Please set out what change(s) you consider necessary to make the Local Plan legally compliant or sound, having regard to the test you have identified at Q3 above where this relates to soundness. You will need to say why this change will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text. Please be as precise as possible:

The proposed wording of Policy CM4 has been altered from that published in Policy 46 of the Local Plan Viability Study (July 2014). Item 7 makes specific reference to the physical security measures that shall be incorporated, i.e. the specification of exterior doors, windows, glazing to resist forced entry. This is a crucial element to a balanced security package, as well as the environmental layout.

I submit that the proposed wording for Policy CM4 should read:

The design of all new development must contribute to creating a safe and secure environment, integrating measures for security and crime prevention and minimising the opportunity for crime.

The following points should be applied to all development proposals;

1. Developers should demonstrate how security measures form an integral part of the design;
2. Developments should be laid out and buildings positioned with the intention of creating active and vibrant neighbourhoods and maximising natural surveillance opportunities;
3. Public and private spaces should have clearly defined boundaries, utilising appropriate physical treatments and promoting the concept of 'defensible space';
4. Footpaths and cycleways should be designed to maximise legitimate use. Routes must serve the development and not present opportunities for concealment, unobserved access, or a choice of escape routes;
5. Good lighting is essential to deterring criminal and anti-social activity. Spaces must be evenly illuminated to an appropriate level, whilst avoiding nuisance, annoyance and unnecessary spill or pollution;
6. Landscaping schemes require careful and sensitive consideration to ensure that they do not create secluded areas, impede surveillance opportunities, or position elements that could be exploited as climbing aids;
7. Developers should indicate what physical security measures have been incorporated into the design to resist crime (for example, the specification of doors and windows compliant with BS PAS 24:2012 or LPS 1175, presence of laminated glazing or the provision of intruder alarm systems, etc);
8. The deployment of (Closed Circuit Television) CCTV may be considered necessary in certain circumstances;

Accompanying texts at 8.15, 8.16, 8.17 and 8.18 each provide important supplementary information.

Q7. If your representation is seeking a change; do you consider it necessary to participate in the hearing sessions of the examination?

- ☒ No, I do not wish to participate at the hearing sessions of the examination
☐ Yes, I wish to participate at the hearing sessions of the examination

Q8. If you wish to participate, please outline why you consider this to be necessary:

Please note it will be at the discretion of the Inspector to determine the content of the hearing sessions and who will be heard.
