Dear Owner/Occupier

Egremont Road, St Bees – Proposed Speed Cushions

I am writing to you to advise that Cumberland Council intends to install 4 sets of speed cushions at the location and dimensions shown on the attached plan and Notice.

I have generated an image to show how the speed cushions may look on site, please note that this is for illustrative purposes only and the speed cushions will have set dimensions as per the plan.

The purpose of these proposed speed cushions is to reduce the speed of vehicles entering the village on Egremont Road and enhance safety for all road users, particularly pedestrians, cyclists, and other vulnerable groups. This measure forms part of the Council's ongoing commitment to improving road safety and encouraging sustainable travel within the area.

The proposed speed cushions will provide a physical speed reduction feature, making drivers more aware of the crossing point and improving visibility for those wishing to cross.

If you wish to comment or make representation in relation to this proposal, please reply in writing to PO Box 415, Carlisle, CA1 9GU or by emailing TROresponses@cumberland.gov.uk quoting reference “**Egremont Road**” **not later than 11th February 2026.**

Yours faithfully

Ben Carter
